Audio Meeting Core

Defined by flexibility and affordability, Audio Meeting Core not only forms the foundation of our conferencing suite, but the bedrock of our clients' conferencing services. Audio Meeting Core delivers all your necessary core conferencing requirements in a single one-stop service, enabling you to connect and engage with those who matter in a time and cost-effective way.

Advanced conferencing functions as standard

Featuring all those functions present in our advanced conferencing service, Audio Meeting Core is a capable choice. With ease-of-use recognised as a crucial function, added functions such as enhanced Chairperson Control are quick to set-up and straightforward to use, making the service a cost-effective alternative to operator assisted calls.

Secure and reliable conferencing anytime and anywhere

Callers with mobile or landline phones can access the service anywhere and at anytime. They enjoy clear and good quality audio from ISDN-based telephony. They're not victims to fluctuating bandwidth or echo, so often associated with slow connections. Neither do they leave service reliability and security in the hands of the Internet. Instead, unsurpassed security and uninterrupted service is delivered through dedicated PSTN lines and Tier 1 primary network servers.

- Consistently Quality Audio
- Enhanced Chair Control
- Customise All Prompts
- Cost Effective Solution
- Migrate Advanced Service

- Store Contacts
- Send Invitations
- Enhanced Security
- Full PIN Reporting
- Call Recording

The self-managed advantage

- Record and retrieve conferences via a dedicated management portal
- Distribute multiple access numbers to mobile and international callers
- Use and control caller types – 'Chairperson, 'Contributor' and 'Audience'

- Manage contacts and send email invitations
- Customise all prompts
- Download reports and statistics to make informed decisions
- Compatible with Audio Meeting Advanced to enable simple migration to the Core service

Dedicated Chairperson control

There's no paperwork; there's no hassle. You run Audio Meeting knowing that you're in full control. From placing callers on hold until Chairpersons arrival, monitoring, identifying, muting and unmuting callers, to inviting or preventing latecomers joining the conference and the ability to end the call immediately with a single click makes your administration straightforward and your management professional.

Audio Meeting Core meets the challenge of staying in touch

Make escalating meeting costs spent on time and travel a thing of the past. Run Audio Meeting Core to benefit from flexible working practices, to connect and engage with anyone, anytime and anywhere.

BCH Solutions specialises in creating feature-rich and innovative call handling products. Through our unique status as a single provider with in-house design, development and support expertise, we offer exceptional product knowledge.
